ICREDITS PH NICOLA CIPRIANI per MELOGRANO

Life in Puglia follows the rhythm of the agriculture and this land is known also as the realm of extra-virgin olive oil. There are 60 million olives trees planted in the region, half of which are hundreds of years old and five millions are over a thousand years old which are now depressingly treathened by Xylella .They are real monuments alive of which Il Melograno, as a fortified Masseria, retains 120 on its property: all centenary still productive trees which are the legacy of the rich cultural tradition centred around olive production of this fascinating XVII Century dwelling house. Don't miss the opportunity to spend one of your Saturday afternoon of vacation to experiment this unusual itinerary. Unusual as it is designed by our **Marina, Agro-expert** and **Biologist** passionate about her work, research coordinator for the CNR in projects of sustainable agriculture, who will drive you for almost 3 hours around the hidden corners of the Masseria, talking about pills of Apulian agricultural history and letting you discover the nutraceutical properties of produces of Melograno gardens. A **sensory educational journey** which turns emotional and innovative in the **tasting activity** of the olive oil varieties produced at Melograno, and in the contemplative experience of **the sublime, "il bello"**, of those majestic natural pieces of art. A path which is enhanced by the **scientific accuracy** of the disclosure of the local agricultural knowledge and which will lead you becoming an OLEOLOGIST OF PUGLIA, a real ambassador of our treasures. A **Nutraceutical quite unique tasting** surprise will end the activity.

**Estimated Total time for the activity: 1 hour / ON SATURDAYS 5:30 PM; UPON AVAILABILITY OTHER RO**
