Meeting with the tour director on the slopes of Ostuni hills to start your tour on the Renault Twizy (two-seaters electric car) to explore the area in the nearby where tradition and nature perfectly blend: the Regional Natural Park Dune Costiere [costal dunes] is the place where historical memories, natural habitats, species of plants and animals co-exist. Leaving the White Ostuni panorama on our back, you will head towards *Piana degli ulivi millenari* along the ancient Via Traiana (now renamed as **Via Francigena of the South**) following the trances of ancient Romans, pilgrims and Templars who started their journey from North Europe and Rome to reach Brindisi and sail to the Holy Land. The Via Traiana is the theme of many of the historical and cultural evidences of this territory: the Roman and medieval underground oil mills, the system of historic farms, the rock settlements, numerous places of worship and then the dry-stone walls and terraces: more than 4000 years of history witnessed by the Dolmen in Montalbano which dates back to the Eneolithic (III-II millennium BC) and deserves a special attention. This experience could be enriched by a visit to a Masseria with a **blind tasting of three BIO-EVO olive oils** on cruncy *friselline*. Many underground oil mills have been created by man in natural cavities, placed on either side of the ancient Via Traiana. Many of them are of Roman origin, often modified in the Middle Ages; their employment lasted until the mid-nineteenth century, when they were replaced by epigeal mills, more functional and productive. The proximity to the ancient Roman road allowed the oil transport to the commercial ports Brindisi and this explains why so many mills are settled along this path. At the end of the Twizy tour you can book at extra costs a 1h and ½ walking tour of Ostuni or an **Apecalessino tour** if you have walking problems. European Driving licence is mandatory to drive the Twizy. Referrer to the reception to book the experience. **Estimated Total time for the activity: 2 hours and ½ h**
